Cervical Cancer 
What you need to know

10 WARNING SIGNS OF CERVICAL CANCER

- Unusual vaginal discharge
- Abnormal vaginal bleeding
- Heavier & longer menstrual cycle
- Discomfort while urinating
- Loss of bladder control
- Pain during intercourse
- Constant fatigue
- Pelvic pain
- Unexplained weight loss
- Leg pain

TREATMENT
Treatment includes surgery, radiation, chemotherapy and/or biological therapy.

Cervical Cancer is preventable
If caught early, cervical cancer has a high survival rate

A Pap smear can find precancerous changes in the cervix and an HPV test can determine if you carry the virus. Woman over the age of 30 now have the option of choosing an HPV test only, which has been shown to be effective in screening for cervical cancer.
